

## ***Decorative Pavement***

On use for the decorative brick pavers will be to set the landscaped seating areas off from the rest of the sidewalks.

The other use for the brick pavers will be to cover the tree root areas while allowing moisture to permeate those areas.

*I understand there is a proposed road project*

*this will be paired with.*

The Main Street Enhancement project is intended to be paired with the 2008 M-52 reconstruction project.
